

備考	
----	--

Figure 1 is a graph showing the relationship between height (高さ) and horizontal distance (水平距離) for various sound pressure levels (1000, 900, 800, 700, 600, 500, 400, 300, 200, 100, 50). The graph is divided into two sections: A-A (left) and B-B (right). The vertical axis represents height in meters (0 to 5), and the horizontal axis represents horizontal distance in meters (0 to 4). The sound pressure level is indicated by the radius of the circles, with the initial value (初期値) being 1000. The angles 58° and 57° are marked at the top of the graph.
